

Figure 1

This exploded perspective view shows the assembly of the device. The components are labeled with reference numerals: 12 (the main body), 20 (a small internal component), 26 (a sleeve or collar), 28 (a pin or clip), 30 (a cylindrical component), 40 (a small cylindrical component), 41 (a larger cylindrical component), 50 (a long tube), 64 (a small component), 70 (a small cylindrical component), 71 (a small component), 80 (a small cylindrical component), 81 (a small cylindrical component), 100 (a component with a wavy edge), and 104 (a component with a wavy edge). The assembly is shown in a disassembled state, with the components arranged to show their relative positions and how they fit together.

Figure 3 is a schematic diagram of a mechanical component, possibly a valve or a part of a pump. The component has a complex, irregular shape with several internal features. Label 100 points to the outer boundary of the component. Label 101 points to a specific internal feature, likely a valve seat or a guide. Label 102 points to another internal feature, possibly a valve or a plug. Label 103 points to a third internal feature, which appears to be a small, rounded protrusion or a seal. The diagram is a cross-sectional view, showing the internal structure of the component.

Figure 16

Figure 17

Figure 20

Figure 21

This exploded perspective view shows the assembly of the device. At the top is a cylindrical component 310 with a flange 312. Below it is a bracket 320 with a central opening 326. Further down is a cylindrical component 330 with a flange 335. Below that is a small ring 340. At the bottom is a larger cylindrical component 353. A line 310 points to the main body of the device, and a line 312 points to the flange.
